A VISIT TO the primary section was a wonderful experience. It was a treat to see the students of grade I and II involved in various activities . We visited the art & craft section .The children were indulged in various art activities under the guidance of their teacher Mrs. Geeta Puri. There were 28 students and they were busy with colours and paint brushes. They were trying to draw the best piece of art. Many had colour smeared on faces and they were looking very cute. They were enjoying completely.

They had made beautiful painting with their thumbs and one could not imagine that it was made by such budding artists. They had made many other things like masks with the help of cotton, paper, ice cream sticks and crayons. They were looking really beautiful. They had also made fish and animal faces with the help of glazed paper. This enhanced their observation and visual skills.

The motive is to bring out their talent and help them to make the best out of the waste. It also focuses on the active participation of the students in extra curricular activities. This activity relaxes their minds and improves their learning process. They also learn to cooperate with each other and it inculcates the team spirit among them. It also helps the students to enhance their creativity.
