April 21, 2023

MSSSP and **MNSP** wished '**Happy Earth Day**' to all their students and parents in a very unique way. Earth is the reason behind our happy lives full of comforts and good food. Earth day is the moment to pay gratitude as our earth has given us so much and it is our time to pay back. The students were enlightened about the same with many activities.

They were guided about their responsibilities as the youth of the world. They learnt the importance to save earth by restraining themselves from polluting the environment. They were encouraged to plant more trees, abstain the use of plastic and to reduce, reuse and recycle to make our Mother Earth happier.
